Justification

Provides a multimodal system for moving pedestrians and cyclists utilizing existing city owned land or easements makes this project (Phase 1) highly viable. It provides alternative means for Blinn students to access the Blinn Campus without using cars, reducing traffic congestion, and providing recreational benefits to students. The trail could also provide an alternate mode of transportation to and from work, shopping and medical district. It would go through an age restricted subdivision with an existing trail system and connects multiple parks along its route along with several community destinations like the Bryan Town Center.
