### Description

This projects replaces existing 15" and 18" storm sewers with 18" and 24" storm sewers to increase the capacity of the existing system.

### Justification

Currently stormwater accumulates on Carter Creek at the intersection of Westview St. The existing stormdrain system is inadequate to carry the flows to the creek along Carter Creek, so excess flows leave the ROW and are conveyed overland to the creek across private property. Complaints have been received from the adjacent property owners.
