- Contact Environmental Compliance Officer to schedule an inspection of vehicle(s), once all the above has been completed and approved.
  
- Bring vehicle(s) in for inspection.
  
- Pay permit fee (\$200.00) per vehicle.

## Mark Each Registered Vehicle

You must mark the outside of each motor vehicle that you have registered to transport sludge wastes as follows:

Place a **CURRENT TCEQ vehicle authorization sticker** on each door.

Display on both doors **or** on both sides of the tank:

1. The five-digit TCEQ-issued registration number in block-style numbers that are at least 2 inches tall, permanently attached, and clearly visible from a distance of 50 feet.
2. The name and local phone number of your company.

If the wastes you transport are liquids, place a sight gauge on the vehicle's waste-holding tank that indicates whether the tank is loaded and the **approximate capacity**.

Usually placed at the rear or front of the tank, the gauge must show what percentage of the tank's capacity is filled, unless you have our prior written approval for the gauge to show the actual volume instead.

Prominently **mark all inlet and discharge valves**. Make sure that all discharge ports are prominently marked, visible, and readily accessible.

**Figure 1. Example of Vehicle Marking and Sticker Placement**

If you sell one of these registered vehicles, you must remove the TCEQ registration number, the TCEQ vehicle authorization stickers, and your company name and phone number from the side of the vehicle.
